# ***The Next Generation of Metal Roofing***

- *Durability*
- *Versatility*
- *Flexibility*

**Everlast  
Roofing, Inc.**

OUR NAME SAYS IT ALL

## Multiple Applications

The Everlast PBR Panel is designed for both roofing and siding applications. This panel is excellent for most any exterior use, including industrial, commercial, and agricultural applications. The PBR Panel can also be used as an interior liner panel.

The PBR Panel provides optimum strength, which is ideal for maximum spanning capabilities, and the weather-tight side lap allows for applications on roof pitches as low as a 1:12.

The PBR Panel is manufactured in an unpainted Galvalume Plus® substrate in both 24 and 26 gauge. A painted 26 Gauge galvalume substrate is also available in a variety of colors. Because Everlast's painted panels are manufactured with Heat Forming technology, the paint system we use is more flexible and therefore better able to withstand the rigors of the forming process. The result is uncompromised paint coverage and outstanding barrier protection. This barrier protection prevents corrosion by isolating the steel from the environment; an assurance that your project will be attractive and durable for many years to come.
